SKILLS

Web Development
Flask, Django, ReactJS, RESTful API Development

Databases
MySQL, MongoDB

Tools
GitHub, AWS

CERTIFICATES

- HTML, CSS, JS & PythonEssential Training
- Al Prompt Engineering
- Code Contest Runner
- Python Full Stack Development
- Internship

PROFILE

I am a final-year Computer Science undergraduate with a focus on building responsive, scalable web applications using Flask, Django, and ReactJS. Through my freelance work with TechLanC, I have delivered over 15 customized digital solutions. I am particularly adept at quick iteration and troubleshooting, ensuring projects move from concept to deployment efficiently. Additionally, I possess a strong ability to work closely with AI teams, leveraging my experience in AI Prompt Engineering and deep learning projects to bridge the gap between web architecture and intelligent systems.

EDUCATION

Oct,2022 - Present
B.E Computer Science and Engineering
Tagore Engineering College, Rathinamangalam
CGPA: 7.85

Apr,2021 - Jul,2022
Higher Secondary Education
Kendriya Vidyalaya No:1, Kalpakkam
Percentage: 68% Participated in programming activities.

Apr,2019 - Jul,2020
Secondary Education
Kendriya Vidyalaya No:1, Kalpakkam
Percentage: 65% Recognised for creativity and problem-solving skills.

EXPERIENCE

Profile • Freelancing
May, 2023 - Present
Collaborated with TechLanC, an initiative started as a college friends group, to design and deliver 15+ responsive websites and scalable web applications, working closely with clients to understand business requirements and provide customised, results-driven digital solutions.

PROJECTS

Indian Sign Language(ISL) Translation System
Developed a web application that converts speech and text into animated ISL using real-time 3D rendering. *Github: Link*

Pneumonia Detection
Built a deeplearning model for detecting specific phenomena using Python.
Github: Link

DealWalker Online Auction Platform
Developed a full-stack auction platform with RESTful APIs, real-time bidding, and MongoDB integration. *Github: Link*

Wolf Blogs – Full StackBlogging Platform
It's a full-featured dynamic blogging platform. It allows users to authenticate, create blogs, manage content, and interact through a clean, responsive interface.
